

PRESS RELEASE**Pluggable: Swissbit's certified and secure microSD card for fiscal compliance****Easy-to-install Swissbit solution makes cash registers in Slovakia tamper-proof**

Bronschhofen, Switzerland. October 2, 2019 – Swissbit collaborates with cash register solution suppliers, such as A3 Soft, AXASOFT, PC3000, Papaya POS and Solitea Pay in Slovakia to offer certified solutions for tamper-proof recording of POS (Point of sale) data. The Swissbit secure microSD card has recently been certified in Slovakia and allows easy system integration for both manufactures of traditional POS systems as well as POS software providers for PCs or tablets. For existing POS systems it is also a very cost-effective retrofit-solution.

It's not an easy feat, but with the Swissbit fiscal product, manufacturers of cash registers now have a solution that can simply be plugged into any POS system via microSD-port, making it very easy to integrate and retrofit.

Future-proof and easy to integrate Swissbit fiscal solution

Cash register manufacturers can easily integrate the Swissbit fiscal solution into their systems. In addition to the secure microSD card, Swissbit also provides an SDK (Software Development Kit), drivers and support for Windows, Linux, Android and embedded systems. In addition, the solution is future-proof and cost-effective.

"We fully understand the complex challenges faced by cash register manufacturers to provide legally compliant cash register. The Swissbit fiscal product is 'pluggable' and therefore offers a unique flexible and easy-to-integrate fiscal solution. Development and production are done in-house and can be completely controlled and flexibly adapted to our customers' requirements," said Hubertus Grobbel, Vice President Security Solutions at Swissbit AG.

Field-tested fiscal solution already used throughout the European Union

Swissbit is an established specialist with over 20 years' experience in demanding industrial-grade storage and security solutions. In addition, Swissbit is well known for its high quality and security standards. The company maintains its own development and manufacturing site for memory products in Berlin, Germany and is therefore also able to offer a flexible and demand-oriented service for customized products. For over three years, Swissbit has been providing proven fiscal solutions in fiscal countries such as France and Germany.
